ALL SKY CAM

190° Horizon to Horizon All Weather Outdoor Video Camera

See the entire sky, day or night, rain or shine!
Ready to go in minutes, easy installation!

The Moonglow Technologies All Sky Cam gives you a live color video view of the entire sky, day or night, rain or shine. Mount it up with a clear view of the sky, connect it up, then sit back and see the sky 24/7/365 from the comfort of your living room or anywhere else. With no confusing controls or requirements, the All Sky Cam is always on, always providing live full color video.

Ready to go in minutes!

With no software to install, and no controls of any kind, all you need to do is mount the camera outside and plug it into your television's video input.

What you can expect to see:

- Astronomical: Sun, Moon, planets, stars, aurora, Milky Way & zodiacal light under dark skies.
- Meteorological: Cloud type and direction, precipitation, lightning, rainbows.
- Terrestrial: Nearby trees and buildings, horizon line.

Only \$399.95

An Indispensable Tool

- Professional observatories - spot clouds before they ruin observations.
- Amateur astronomers - decide whether tonight is worth going out for.
- Remote observatories - monitor the entire sky better than if you were there.
- Astronomy dark sky sites - know the conditions before driving a long distance.
- Weather enthusiasts - see cloud and precipitation types instantly.

Video system: Composite NTSC, 60Hz interlaced color

Maximum illumination: 0.0002 lux (starlight)

Exposure time: 1/100,000 to 4 seconds, automatic

Field of view: 190 degrees hemispherical

Power: 12VDC with 120VAC US plug wall supply included

Video Connection: Female BNC or 25 foot male RCA cable

ALL SKY CAM UPLOADER

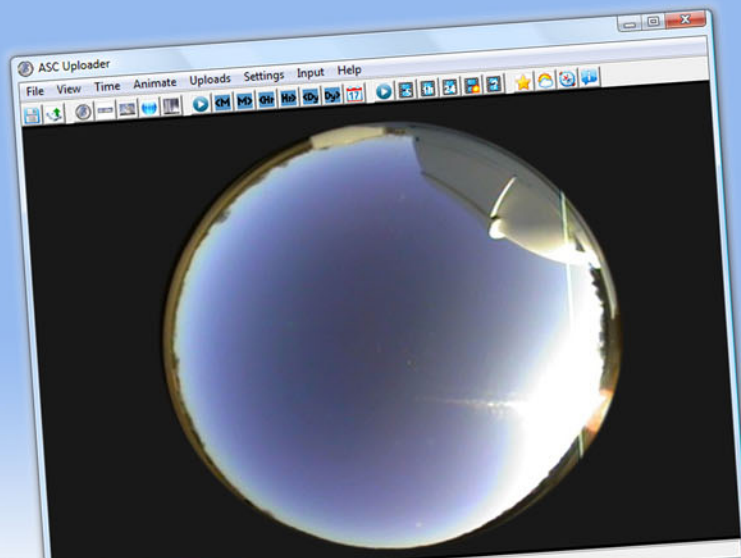

USB Interface and Software for Windows
Share your sky, or check your conditions from afar!

ASC Uploader for Windows is an optional package that works in concert with an included USB 2.0 digitizer to capture, archive, animate, and upload your All Sky Cam images to the Internet.

Includes 1 year of image hosting on AllSkyCam.com for an effortless and automatic way to get your All Sky Cam live on the Internet!

Features

- Capture and display ASC images on your PC.
- Automatically upload images to the AllSkyCam.com network for sharing.
- Automatically archive images for later reference.
- Easily assemble and display time lapse movies.
- Remap ASC images into a panoramic horizon strip.
- Reproject ASC images as if using a normal, non-fisheye camera lens.
- Planetarium to identify stars and planets.
- Detect and save moving objects like satellites, aircraft, and meteors.
- Automatically FTP upload images and movies to your own website, Weather Underground, or another folder or hard drive.
- Privacy masking to cover up areas of the image you do not want uploaded.
